- 1. Wranium ore continues to be reloaded at Bad Blankenburg. The trains loaded with ore always are routed from there through Frankfurt/Oder. The trains of ore always arrive at Bad Blankenburg from the uranium ore area at night. Reloading of the ore takes place only at night.
- 2. The trains come from Kirchberg, Wilken-Hasslau*, Klingenthal, and Werdau.
- 3. The ore arrives in Bad Blankenburg sorted into types1, 2, and 3. The trains are reassembled at Bad Blankenburg, so that the individual trains carry only one kind of ore. Ores of type 1 are never unloaded, but are collected as rapidly as possible for shipment to Russia. Other types of ore are, in general, not dispatched so quickly. France freight trains are assembled here.
- 4. The one that arrives in Bad Blankenburg is already cleaned.
- 5. Strong security measures have been instituted to prevent any unauthorized civilians from obtaining information about the shipments or stealing ore. The guard personnel is headed by Yolkspolizei-Oberrat Kollmann. His superior is a Russian captain named Boris Goryet. The State Security Service is represented in force. The locomotive engineers are almost all activists and receive special bonuses.
- 6. On the night of 14 to 15 February 1952, four ore trains arrived at Bad Blanken-burg. These came from Werdau and Klingenthal. On 16 February, at 12:45 a.m., a freight train left the Bad Blankenburg station for Frankfurt/Oder with type 1 ore. An average of three trains a week leave Bad Blankenburg station with type 1 ore.

* Probably Wilkau and Hasslau.
